RE: Request for Evolocumab (Repatha)
Indication: Established ASCVD - severe peripheral artery disease status post left femoral-popliteal bypass graft (ICD-10: I70.212).
Requested Regimen: Repatha SubQ injection - Dose: [ ] Freq: [ ]
Dear Reviewer,
I am requesting authorization for Repatha for Dara Pruett (fictional), who has established atherosclerotic cardiovascular disease manifest as symptomatic peripheral arterial disease requiring bypass surgery. Patient previously took atorvastatin 40 mg daily but discontinued due to severe calf cramping. After a statin holiday, she was restarted on rosuvastatin 20 mg daily 45 days ago (started 06/05/2026). Pre-treatment LDL-C on 05/20/2026 was 130 mg/dL.
Sincerely,
Dr. Brian Holt, MD (fictional) 07/20/2026

VASCULAR & CARDIOLOGY HEALTH PARTNERS (fictional) | EHR RECORD
Patient: Dara Pruett (fictional) | MRN: XXXXXXXX | Date: 07/20/2026
Provider: Dr. Brian Holt, MD (fictional)

MEDICATION PROFILE:

Drug Name	Dose	Freq	Start Date	Stop Date	Indication
Rosuvastatin	20 mg	Daily	06/05/2026	Active	ASCVD
Clopidogrel	75 mg	Daily	03/12/2025	Active	PAD
Cilostazol	100 mg	BID	04/10/2025	Active	Claudication

CLINICAL LABS & PROGRESS NOTE:
Specimen collected 07/10/2026.
LDL-C was initially reported as 84 mg/dL, corrected to 68 mg/dL
per direct beta-quantification analysis (Ref range: < 70 mg/dL).
Triglycerides: 280 mg/dL | HDL-C: 44 mg/dL

Addendum: Dr. Brian Holt, MD (fictional) 07/20/2026 14:10 - LDL calculation
corrected following ultracentrifugation; true LDL-C is 68 mg/dL.
Rosuvastatin 20 mg tolerated for 45 days to date; continuation ordered.
