THERAPY REFERRAL
Written September 22 2026
Re: Jalen Orwick (fictional)
From: Dr. Sera Nollin (fictional)
Jalen is 39 years old and returns for glucose management.
Please authorize semaglutide for type 2 diabetes.
The prescription is 0.5 mg subQ once each week.
Previous treatment was reviewed with the patient.
Metformin 500mg b.i.d. was taken for four months.
It was stopped for an inadequate response.
No pretreatment or on-treatment A1c was supplied for that course.
Current HbA1c is 7.8%, sampled September 15 2026.
The patient prefers an injection to an additional daily tablet.
Teaching will occur at the next visit.
Signed: Sera Nollin (fictional)
