DERMATOLOGY TRANSFER LETTER

Dated 2026-10-21

Patient: Savi Norlen (fictional), age 44

Prescriber: Dr. Eren Calwick (fictional)

I am requesting adalimumab for moderate-to-severe plaque psoriasis.

Plaques interfere with sleep and dressing.

The maintenance prescription is 40mg SC every other week.

Earlier systemic treatment is summarized below.

Methotrexate 15 mg PO weekly, 2026-01-02 to 2026-08-28.

BSA before treatment: 19% on 2026-01-01.

BSA while taking treatment: 14% on 2026-04-20.

Latest skin measurement: BSA 16% on 2026-10-14.

Patient reports no missed weekly doses during that course.

Injection education is planned.

Regards, Eren Calwick (fictional)
